RE: Facility ID No. 083-00001, The Amalgamated Sugar Company – Twin Falls Facility
Final Permit Letter

Dear Mr. Pool:

The Department of Environmental Quality (DEQ) is issuing Permit to Construct (PTC) No. P-2010.0108 PROJ 60566 to The Amalgamated Sugar Company, LLC (TASCO) – Twin Falls Facility to replace the sugar granulator /cooler system, in accordance with IDAPA 58.01.01.200 through 228 (Rules for the Control of Air Pollution in Idaho).

This permit is based on your permit application received on September 8, 2010. This permit is effective immediately. This permit does not release TASCO from compliance with all other applicable federal, state, or local laws, regulations, permits, or ordinances.

This permit to construct does not contravene any existing Tier I operating permit conditions; therefore, the process or equipment may be operated in accordance with the permit to construct before the Tier I operating permit is issued. As requested, the permit to construct will be incorporated into the Tier I operating permit at the time of renewal.

Pursuant to the Construction and Operation Notification General Provision of your permit, it is required that construction and operation notification be provided. Please provide this information as listed to DEQ's Twin Falls Regional Office, 1363 Fillmore, Twin Falls, ID 83301, Fax (208) 736-2194.

In order to fully understand the compliance requirements of this permit, DEQ highly recommends that you schedule a meeting with Steve VanZandt, Air Quality Analyst, at (208) 736-4261 to review and discuss the terms and conditions of this permit. Should you choose to schedule this meeting, DEQ recommends that the following representatives attend the meeting: the plant manager, responsible official, environmental contact, and any other staff responsible for day-to-day compliance with permit conditions.

Pursuant to IDAPA 58.01.23, you, as well as any other entity, may have the right to appeal this final agency action within 35 days of the date of this decision. However, prior to filing a petition for a contested case, I encourage you to contact Morrie Lewis at (208) 373-0502 or Morrie.Lewis@deq.idaho.gov to address any questions or concerns you may have with the enclosed permit.

Sincerely,

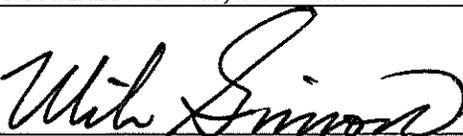

A handwritten signature in black ink that reads "Mike Simon". The signature is written in a cursive style with a large, stylized "M" and "S".

Mike Simon
Stationary Source Program Manager

PERMIT AUTHORITY			
<p>This permit is issued according to the Rules for the Control of Air Pollution in Idaho, IDAPA 58.01.01.200 through 228, and pertains only to emissions of air contaminants regulated by the state of Idaho and to the sources specifically allowed to be constructed or modified by this permit.</p> <p>This permit (a) does not affect the title of the premises upon which the equipment is to be located; (b) does not release the permittee from any liability for any loss due to damage to person or property caused by, resulting from, or arising out of the design, installation, maintenance, or operation of the proposed equipment; (c) does not release the permittee from compliance with other applicable federal, state, tribal, or local laws, regulations, or ordinances; (d) in no manner implies or suggests that the Department of Environmental Quality (DEQ) or its officers, agents, or employees, assume any liability, directly or indirectly, for any loss due to damage to person or property caused by, resulting from, or arising out of design, installation, maintenance, or operation of the proposed equipment.</p> <p>This permit will expire if construction has not begun within two years of its issue date or if construction is suspended for one year.</p> <p>This permit has been granted on the basis of design information presented with its application. Changes in design, equipment or operations may be considered a modification. Modifications are subject to DEQ review in accordance with IDAPA 58.01.01.200 through 228 of the Rules for the Control of Air Pollution in Idaho.</p>

PERMIT TO CONSTRUCT SCOPE.....3
GRANULATOR SYSTEM.....4
PERMIT TO CONSTRUCT GENERAL PROVISIONS5

PERMIT TO CONSTRUCT SCOPE

Purpose

1. This is the initial permit to construct (PTC) a granulator system.
2. The emission source regulated by this permit is listed in the following table.

REGULATED EMISSION POINT SOURCE TABLE

Emissions Unit Description	
<u>Granulator System (P-W1A), with Baghouse (A-W1A)</u>	
Manufacturer:	BMA, with Scheuch
Model:	Drum Dryer 3.2 M Fluidized-Bed Cooler FCP Baghouse SFDW 05/12-D-04
Manufacture date:	2011
Maximum capacity:	110,230 lb/hr wet sugar ≤1.2 klb/hr steam usage
Maximum operation:	24 hr/day and 330 day/yr

GRANULATOR SYSTEM

Process Description

This process description section provides a summary description of the granulator system, and has been provided for informational purposes only.

The granulator system receives wet sugar from the crystallizer system. The granulator process thermally evaporates residual water from wet sugar and cools the dry sugar for subsequent storage and packaging. The granulator system consists of a two-stage rotating drum dryer/cooler, followed by a fluidized-bed cooler. Sugar and conditioned air are supplied to the granulator system in countercurrent fashion. Air heated by heat exchanger using boiler steam is supplied directly to the drying stage of the rotary drum. Cooling air is introduced in the fluidized bed cooler and then passes to the cooling stage of the rotary drum. All of the exhaust from the granulator system passes through a baghouse to recover sugar dust generated in the drying and cooling units. Sugar recovered in the baghouse is reprocessed in the factory. The sugar dust recovery baghouse is integral equipment to the granulator process. The granulator system will not operate unless the baghouse is fully functional.

Ancillary equipment associated with the granulator system includes enclosed screw conveyors, rotary air locks, bucket elevator, lump sifter, fans, heat exchangers, pumps, pipelines, and air ducting. The granulator system and ancillary equipment will be located within a building and fugitive emissions were assumed to be negligible.

Emission Limits

3. **Opacity Limit**

Emissions from the granulator system, or any other stack, vent, or functionally equivalent opening associated with the granulator system, shall not exceed 20% opacity for a period or periods aggregating more than three minutes in any 60-minute period as required by IDAPA 58.01.01.625. Opacity shall be determined by the procedures contained in IDAPA 58.01.01.625.

4. **Process Weight Limitations**

The permittee shall not emit PM to the atmosphere from any process or process equipment in excess of the amount shown by the equations in IDAPA 58.01.01.700-703, where E is the allowable emission from the entire source in pounds per hour, and PW is the process weight in pounds per hour.

- The granulator system is process or process equipment as defined in IDAPA 58.01.01.006.
- If PW is less than 9,250 lb/hr,
 $E = 0.045(PW)^{0.60}$
- If PW is equal to or greater than 9,250 lb/hr,
 $E = 1.10(PW)^{0.25}$

Reporting

5. **Equipment Shutdown Notification**

- The permittee shall provide notification of the actual date of initial startup of the granulator system as required in the construction and operation notification general provision (Permit Condition 10).
- Within 15 days after completing permanent shutdown of the existing granulator process, the permittee shall provide written notification to DEQ of the date of the permanent shutdown of the existing granulator process. The notification shall include a description of the method used to ensure permanent shutdown of the existing granulator process.

PERMIT TO CONSTRUCT GENERAL PROVISIONS

General Compliance

6. The permittee has a continuing duty to comply with all terms and conditions of this permit. All emissions authorized herein shall be consistent with the terms and conditions of this permit and the Rules for the Control of Air Pollution in Idaho. The emissions of any pollutant in excess of the limitations specified herein, or noncompliance with any other condition or limitation contained in this permit, shall constitute a violation of this permit and the Rules for the Control of Air Pollution in Idaho, and the Environmental Protection and Health Act, Idaho Code §39-101, et seq.
- [Idaho Code §39-101, et seq.]**
7. The permittee shall at all times (except as provided in the Rules for the Control of Air Pollution in Idaho) maintain in good working order and operate as efficiently as practicable, all treatment or control facilities or systems installed or used to achieve compliance with the terms and conditions of this permit and other applicable Idaho laws for the control of air pollution.
- [IDAPA 58.01.01.211, 5/1/94]**
8. Nothing in this permit is intended to relieve or exempt the permittee from the responsibility to comply with all applicable local, state, or federal statutes, rules and regulations.
- [IDAPA 58.01.01.212.01, 5/1/94]**

Inspection and Entry

9. Upon presentation of credentials, the permittee shall allow DEQ or an authorized representative of DEQ to do the following:
- Enter upon the permittee's premises where an emissions source is located or emissions related activity is conducted, or where records are kept under conditions of this permit;
 - Have access to and copy, at reasonable times, any records that are kept under the conditions of this permit;
 - Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit; and
 - As authorized by the Idaho Environmental Protection and Health Act, sample or monitor, at reasonable times, substances or parameters for the purpose of determining or ensuring compliance with this permit or applicable requirements.
- [Idaho Code §39-108]**

Construction and Operation Notification

10. The permittee shall furnish DEQ written notifications as follows in accordance with IDAPA 58.01.01.211:
- A notification of the date of initiation of construction, within five working days after occurrence;
 - A notification of the date of any suspension of construction, if such suspension lasts for one year or more;
 - A notification of the anticipated date of initial startup of the stationary source or facility not more than sixty days or less than thirty days prior to such date;
 - A notification of the actual date of initial startup of the stationary source or facility within fifteen days after such date; and

- A notification of the initial date of achieving the maximum production rate, within five working days after occurrence - production rate and date.

[IDAPA 58.01.01.211, 5/1/94]

Performance Testing

11. If performance testing (air emissions source test) is required by this permit, the permittee shall provide notice of intent to test to DEQ at least 15 days prior to the scheduled test date or shorter time period as approved by DEQ. DEQ, at its option, may have an observer present at any emissions tests conducted on a source. DEQ requests that such testing not be performed on weekends or state holidays.
12. All performance testing shall be conducted in accordance with the procedures in IDAPA 58.01.01.157. Without prior DEQ approval, any alternative testing is conducted solely at the permittee's risk. If the permittee fails to obtain prior written approval by DEQ for any testing deviations, DEQ may determine that the testing does not satisfy the testing requirements. Therefore, at least 30 days prior to conducting any performance test, the permittee is encouraged to submit a performance test protocol to DEQ for approval. The written protocol shall include a description of the test method(s) to be used, an explanation of any or unusual circumstances regarding the proposed test, and the proposed test schedule for conducting and reporting the test.
13. Within 30 days following the date in which a performance test required by this permit is concluded, the permittee shall submit to DEQ a performance test report. The written report shall include a description of the process, identification of the test method(s) used, equipment used, all process operating data collected during the test period, and test results, as well as raw test data and associated documentation, including any approved test protocol.

[IDAPA 58.01.01.157, 4/5/00]

Monitoring and Recordkeeping

14. The permittee shall maintain sufficient records to ensure compliance with all of the terms and conditions of this permit. Records of monitoring information shall include, but not be limited to the following: (a) the date, place, and times of sampling or measurements; (b) the date analyses were performed; (c) the company or entity that performed the analyses; (d) the analytical techniques or methods used; (e) the results of such analyses; and (f) the operating conditions existing at the time of sampling or measurement. All monitoring records and support information shall be retained for a period of at least five years from the date of the monitoring sample, measurement, report, or application. Supporting information includes, but is not limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation and copies of all reports required by this permit. All records required to be maintained by this permit shall be made available in either hard copy or electronic format to DEQ representatives upon request.

[IDAPA 58.01.01.211, 5/1/94]

Excess Emissions

15. The permittee shall comply with the procedures and requirements of IDAPA 58.01.01.130-136 for excess emissions due to startup, shutdown, scheduled maintenance, safety measures, upsets and breakdowns.

[IDAPA 58.01.01.130-136, 4/5/00]

Certification

16. All documents submitted to DEQ, including, but not limited to, records, monitoring data, supporting information, requests for confidential treatment, testing reports, or compliance certification shall contain a certification by a responsible official. The certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document(s) are true, accurate, and complete.

[IDAPA 58.01.01.123, 5/1/94]

False Statements

17. No person shall knowingly make any false statement, representation, or certification in any form, notice, or report required under this permit, or any applicable rule or order in force pursuant thereto.
[IDAPA 58.01.01.125, 3/23/98]

Tampering

18. No person shall knowingly render inaccurate any monitoring device or method required under this permit or any applicable rule or order in force pursuant thereto.
[IDAPA 58.01.01.126, 3/23/98]

Transferability

19. This permit is transferable in accordance with procedures listed in IDAPA 58.01.01.209.06.
[IDAPA 58.01.01.209.06, 4/11/06]

Severability

20. The provisions of this permit are severable, and if any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.
[IDAPA 58.01.01.211, 5/1/94]
