Reuse Permit

M-117-03 — Modification 1

Permittee Name: West Mountain Sewer and Water

Effective Date of this Modification: September 30, 2016

Complete Description of Modification

The purpose of this Minor Modification is to extend the seepage testing completion dates for three of the wastewater treatment and storage lagoons (LG-11701, LG-11703, and LG-11704) at West Mountain Sewer and Water (WMSW) wastewater treatment facility to June 30, 2017. WMSW requested an extension to allow the seepage testing of the lagoons to be conducted at a time when the lagoons will normally be full, prior to the land application season. The extension will also provide WMSW the opportunity to obtain approval from the Idaho Department of Environmental Quality (DEQ) to operate aerobic treatment lagoon LG-11702, which would allow aerobic treatment lagoon LG-11701 to be taken out of service during seepage testing.

Section 3. On page 10 of the Reuse Permit, Compliance Activity CA-117-06 in the Compliance Schedule for Required Activities shall be replaced with the following:
