

Comments submitted at the May 10, 2019 negotiated rulemaking meeting
Docket No. 58-0101-1901
Lewiston regional office meeting location
Submitted by Kevin Chaffee, NCF

The term "Burn Boss" refers to a highly trained and certified professional with 34 hours of training and a lot of additional experience. A Certified Burner (34 hours of training) would be well worth it for all burners no matter the size of burn.

DEQ delegating to the air shed group, or perhaps a dual approval should be an option to consider. The concern is that DEQ personnel do not have the experience necessary in the prescribed burning field.
