Why are you applying? (Check all that apply.)

Not satisfied with current device To reduce pollution To save money

Other

Was the grant funding a significant factor in deciding to replace your stove? Yes No

II. Existing Residential Woodstove

Make

Model

Year manufactured
(if known)

- No retroactive rebates are available.
- Only one stove will be replaced with a qualified heating device with funding from this program for primary heating of my residence.
- If I qualify for the program, the new appliance must be professionally installed by a Participating Vendor. Self-installation of the device is prohibited.
- I will be replacing an operable stove that is currently in use in my residence. The Participating Vendor who installs the new qualified heating device is responsible for removing the old stove and documenting its disposal. The old stove will be rendered permanently and irreversibly inoperable. ***I may not keep the old stove, and it may not be sold.***
- I will be disqualified from this program if I provide false information, if the old stove is removed from the residence prior to Participating Vendor removal, or if a new heating device is purchased prior to DEQ review of the Participating Vendor's estimate.
- DEQ does not warranty any qualified heating devices purchased under this program, including, but not limited to, the quality, functionality, or satisfaction with the device. Any and all warranties are through the device manufacturer and Participating Vendor.
- I agree to hold harmless DEQ and its director, employees, and agents from any and all loss, damage, or liability that arises out of or is in any way connected with installation or use of the device installed under this program.
- I will follow proper burning practices as discussed by the Participating Vendor and in accordance with EPA *BurnWise* educational materials, and ***I will not burn pressure-treated wood, garbage/trash, plastic, or any other EPA-prohibited materials.*** I will operate this qualified heating device according to the manufacturer's instructions.
- I understand that proper wood-burning practices (e.g., burning only dry, natural wood that has been seasoned at least 6 months or commercially designed firelogs approved for woodstove use) and proper stove installation and operation (e.g., maintaining a hot fire) are critical to the effectiveness of my new device.
- If I rent this property to others, I will be required to enter into a Homeowner/Tenant Agreement holding me responsible for training and supervising the tenant on proper appliance operation and for all maintenance of the new device.
- I agree to two follow-up home visits by the DEQ Project Coordinator to assess use and maintenance of device and track program satisfaction. The first home visit will be within 30 days of the new appliance installation; the second will be prior to September 30, 2020.
- I agree to not sell or replace the new EPA-approved device with a noncertified wood or other solid fuel device during the expected lifetime of the new EPA-approved device.

I certify the statements and information in this application are true, accurate, and complete (IDAPA 58.01.01.123).
