

North Idaho Air Quality Summary – April 2020

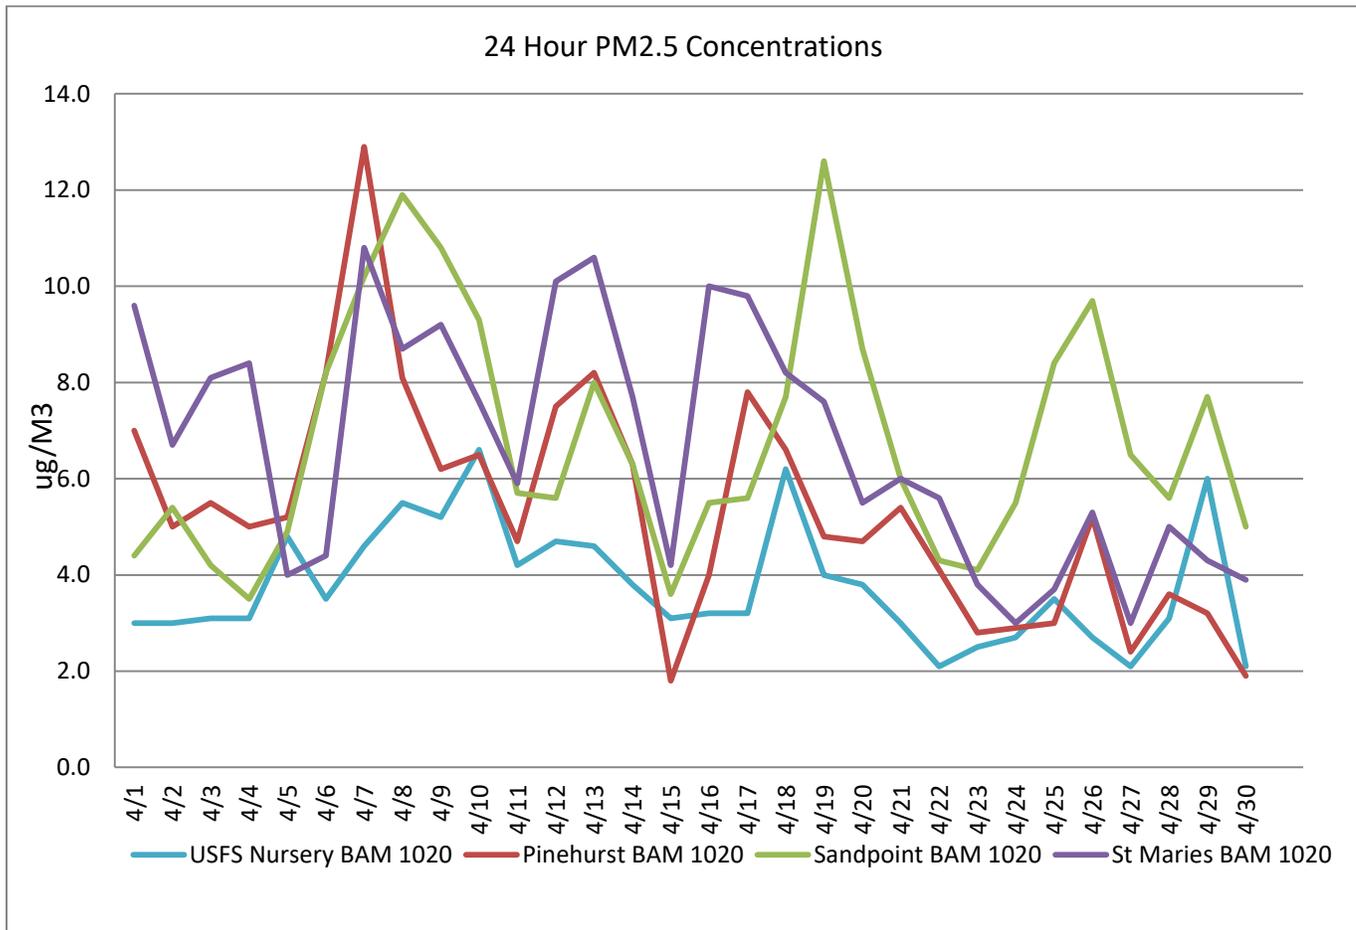

Page 1 of 5

This summary of North Idaho’s air quality is compiled from the various air quality samplers located in the Department of Environmental Quality’s Coeur d’Alene Region for the month of April 2020.

The Coeur d’Alene Regional Network encompasses the counties of Boundary, Bonner, Kootenai, Shoshone, and Benewah. The data presented in this report is considered preliminary data and has not been completely evaluated for all quality assurance requirements and is therefore subject to change.

PM2.5 CONTINUOUS DATA

The graph below displays the average daily 24-hour PM_{2.5} values for the month and is expressed in micrograms per cubic meter, ($\mu\text{g}/\text{m}^3$). These values were calculated by averaging hourly values midnight to midnight from the agency’s PM_{2.5} BAM samplers located in the Cities of Pinehurst, Sandpoint, St. Maries and on Nursery Road in Kootenai County. The 24 hour PM_{2.5} National Ambient Air Quality Standard (NAAQS) is $35 \mu\text{g}/\text{m}^3$.

North Idaho Air Quality Summary – April 2020

Page 2 of 5

The table below shows the maximum 24 hour values calculated from continuous BAM monitoring for this reporting period. The NAAQS for PM_{2.5} is 35 µg/m³ for a 24 hour average. Depiction of preliminary continuous monitoring data in the table below is for informational purposes only and is considered preliminary data.

Monitoring Site	Highest Reading (µg/m ³)	Date
USFS Nursery BAM 1020	6.6	April 10
Pinehurst BAM 1020	12.9	April 7
Sandpoint BAM 1020	12.6	April 19
St. Maries BAM 1020	10.8	April 7

PM_{2.5} FEDERAL REFERENCE METHOD (FRM) DATA

At this time the Coeur d'Alene Regional Office of Idaho DEQ uses the Federal Reference Method Sampler (filter based) measurements for NAAQS compliance determination at the Pinehurst and St. Maries monitoring sites. This method requires that 75% of available data be collected per quarter. Other filter processing requirements are applicable to this method. The Coeur d'Alene Regional Office's collection efficiency rate for April is shown in the table below. The collection percentage could change based on quality assurance requirements yet to be completed.

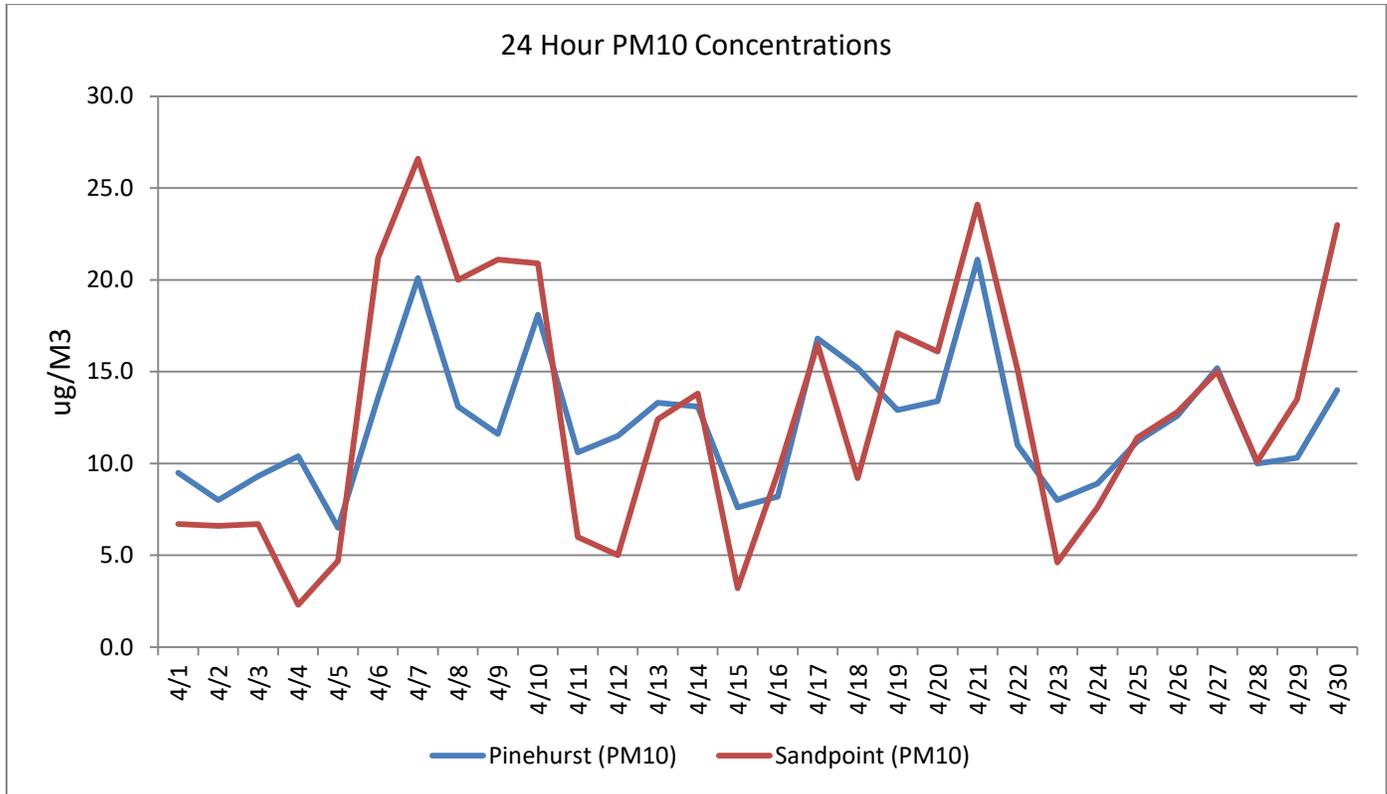

April FRM filter recovery Efficiency

Site	Sample Days	Valid Samples	Collection Percentage
Pinehurst	30	30	100%
St. Maries	30	27	90%

North Idaho Air Quality Summary – April 2020

PM10 CONTINUOUS DATA

The graph below shows the 24 hour values for PM10. There were no apparent exceedances of the 150 $\mu\text{g}/\text{m}^3$ standard for the 24 hour average.

Air Quality Actions

There were no Air Pollution Forecast and Cautions (Stage 1 Burn Ban) issued in north Idaho during the month of April. The department is still requesting the public to refrain from all nonessential open burning activities as communities respond to the spread of the novel coronavirus (COVID-19). The seasonal CRB monitors at Mt. Hall and Porthill were installed in the field in April. The Porthill monitor was delayed in becoming active due to power problems at the original location. The monitor had to be relocated several hundred feet west of the original location in order to obtain power.

NETWORK INFORMATION

The table below summarizes all active and inactive air quality samplers located within the North Idaho area during the month of April 2020.

Site	Monitor	Type	Comments	Current Status	Data Completeness
USFS Nursery	BAM 1020 PM2.5	Continuous		Active	99.7%
USFS Nursery	Meteorological Tower	Continuous		Active	100%
St. Maries	BAM 1020 PM2.5	Continuous		Active	98.8%
St. Maries	Met One E-Seq-FRM PM2.5	Filter		Active	90%
St. Maries	Precision E-SQ-FRM	Filter		Active	80%
Pinehurst	Met One E-Seq-FRM PM2.5	Filter		Active	100%
Pinehurst	BAM 1020 PM2.5	Continuous		Active	99.7%
Pinehurst	BAM PM10	Continuous		Active	99.4%
Pinehurst	Meteorological Tower	Continuous		Active	99.8%
Sandpoint U of I Extension Office	Meteorological Tower	Continuous		Active	100%
Sandpoint U of I Extension Office	BAM 1020 PM2.5	Continuous		Active	98.7%
Sandpoint U of I Extension Office	BAM 1020 PM10	Continuous		Active	99.8%
Lakes Management Plan	Meteorological Tower	Continuous		Active	100%
3 Meter G C Met	Meteorological Tower	Continuous		Active	100%
Porthill International Border Site	MET One E-Sampler Wind speed & direction	Continuous	CRB Seasonal	Active	67.6%
Mt. Hall School	MET One E-Sampler Wind speed & direction	Continuous	CRB Seasonal	Active	97%

During April 15 of 16 active samplers achieved 75% or greater data completeness.

North Idaho Air Quality Summary – April 2020

AIR QUALITY INDEX

The air quality index is a tool used to convey information to the public regarding local levels of air pollution and the associated health concerns. These levels are depicted in the table below.

Air Quality Index (AQI): Particle Pollution

Index Values	Levels of Health Concern	Cautionary Statements
0-50	Good	None
51-100	Moderate	Unusually sensitive people should consider reducing prolonged or heavy exertion outdoors.
101-150	Unhealthy for Sensitive Groups	People with heart or lung disease, older adults, and children should reduce prolonged or heavy exertion outdoors.
151-200	Unhealthy	People with heart or lung disease, older adults, and children should avoid prolonged or heavy exertion outdoors. Everyone else should reduce prolonged or heavy exertion.
201-300	Very Unhealthy	People with heart or lung disease, older adults, and children should avoid all physical activity outdoors. Everyone else should avoid prolonged or heavy exertion.
301-500	Hazardous	People with heart or lung disease, older adults, and children should remain indoors and keep activity levels low. Everyone else should avoid all physical activity outdoors.

Below is a table showing the total Air Quality Index (AQI) values for each of the reporting cities located in North Idaho for this reporting month. Differences in totals were due to sampler down time.

April 2020

Coeur d'Alene	Pinehurst	Sandpoint	St. Maries
Green = 30	Green = 29	Green = 28	Green = 30
Yellow = 0	Yellow = 1	Yellow = 2	Yellow = 0
Orange = 0	Orange = 0	Orange = 0	Orange = 0
Red = 0	Red = 0	Red = 0	Red = 0
Purple = 0	Purple = 0	Purple = 0	Purple = 0
Maroon = 0	Maroon = 0	Maroon = 0	Maroon = 0

2020 YEAR TO DATE AQI TOTALS

Coeur d'Alene	Pinehurst	Sandpoint	St. Maries
Green =119 (100%)	Green =106(88%)	Green =117(97%)	Green = 98 (81%)
Yellow =0	Yellow = 15(12%)	Yellow =4(3%)	Yellow = 23 (19%)
Orange = 0	Orange = 0	Orange = 0	Orange = 0
Red = 0	Red =0	Red =0	Red = 0
Purple = 0	Purple = 0	Purple = 0	Purple =0
Maroon =0	Maroon = 0	Maroon = 0	Maroon = 0
